PAINT PROJECT STUDIO / MANAGER BRIEF

From estimate to crew handoff

A practical painting workflow built for small and midsize operations.

What the manager can demonstrate today

- Customer scope, product and color decisions, job dates, exclusions
- Surface measurements, preparation and quality checklists
- Manual labor/material costing, contingency and suggested quote
- Customer-facing summary and separate printable crew handoff
- Fictional team activity, issue log and emergency work-order form

The separate portable application includes

- A private Python server plus SQLite database; no Netlify dependency
- Employee roles and login, server-saved projects and revision history
- Project activities, encrypted browser drafts and archive exports
- Local database snapshots with recovery controls

Proposed single annual license **$1,999.99 / year**

One package, one price; commercial terms subject to a pilot and agreement.

Status and limits

The hosted browser preview contains fictional examples only. Do not enter customer data there.
The portable edition has passing backend tests. Browser and field deployment still need validation.
Remote hosting, HTTPS, secure offsite backups, support and business integration require setup.
No affiliation with a painting company or purchase obligation is implied.
